Environmental Impact of New or Revised Nursing Course Form

Submit this form with each application for a new or revised course.

Faculty Member/Coordinating Committee: _____

Course prefix and number: _____

Title of Course: _____

1. Check all that apply for students to whom your course is directed:

BSN	___ required	___ elective
MN specialty/option: _____	___ required	___ elective
MS	___ required	___ elective
GCPAPN	___ required	___ elective
DNP specialty/option: _____	___ required	___ elective
PhD	___ required	___ elective
Other: _____	___ required	___ elective

2. Is there need for the course in the program/specialty? Give supporting evidence to your answer.
3. How does this course involve other specialties in the department or school?
4. What is the estimated number of students (based on accurate data also taking into account affect on other specialties)?
5. What are the hidden/assumed costs to the department? Include a summary analysis of the cost versus benefit/savings of the proposed course and short or long term savings or efficiencies that might occur as a result of the course.
6. What resources from faculty and staff are needed to offer the proposed course and how does that impact other specialties?
7. Explain the specific plan of sustainability for the course. If this is a grant funded course, what will be the impact of continuing this course once the grant ends? Why is this a reasonable commitment to be making given budget cuts and diminishing grant funds?
8. Will this course be using eLearning resources, including Web, video, etc.? If yes, how so and how will it be funded?
9. Is a similar course offered anywhere else at the UW? If so, please contact the instructor or department offering that course to determine perceived competition that the new course may present. Summarize below.
10. In the past, have students from the targeted groups for whom this new course is intended taken any of the courses listed above? If yes, approximately how many in which course?
11. What will the new course or course revision accomplish that is not available from the courses currently offered?
12. Does the proposed course offering relate to existing courses at UW? If so, which one(s) and how?
