DO YOU HAVE AN IDEA FOR A DNP STUDENT PROJECT?

DNP FINAL PROJECTS: ACADEMIC-PRACTICE PARTNERSHIPS TO ADDRESS REAL-WORLD ISSUES

Do you have a clinical, system, or organizational issue or problem that could use some consultation or help? If so, our DNP students collaborate with community and clinical agencies to address real-world issues and problems in their Final DNP Project. Students work with an organization/agency to engage in systems analysis and change to improve the health and well-being of groups and populations or improve systems of care.

We seek ideas from our preceptors and community/clinical partners for DNP Final Projects. We are now soliciting projects through July 15, 2022, to be completed in Fall 2022-Winter 2023. Final year DNP students are matched with projects and connect with the agency contact/champion in mid-August. Please ask any of the UW SON faculty, or send an email inquiry to DNP_projects@uw.edu if you want to know more!
